**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-25, drawn to a system for monitoring HTTP transactions between a server and a client wherein the system happens to comprise a debugging controller, classified in class 709, subclass 219.
  - II. Claims 26-30, drawn to specifically a method and tool for testing and debugging a web application and the specifics of how this is accomplished, classified in class 717, subclass 124.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, invention II has separate utility such as testing and debugging any web application and thus does not require the system for monitoring HTTP transactions between a server and a client in invention I.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
